

BE READY FOR THE SOLAS FIRE FIGHTER COMMUNICATION REQUIREMENTS

This new SOLAS regulation requires a minimum of 2 two-way portable radiotelephone sets for communication for each fire-fighting party to be carried on board all SOLAS vessels. For new builds this requirement is already in force, existing vessels need to comply per the first radio survey after July 1st 2018. Any non-complying vessel may be detained, with the risk of significant costs and delays to their shipping schedule. Act now to protect your crew, vessel and business.

**WE OFFER A COMPLETE RADIO
PACKAGE TO GET YOU COMPLIANT:**

SAILOR 3965 UHF Fire Fighter radio
